

**Frampton Construction  
Media Kit: Testimonials**

**Jamie Kniesel, Director  
Aston Properties**

Frampton Construction's team was invaluable to Aston when assessing a complicated re-development of a former big box store. Their real time construction data and estimates allowed us to make sound risk management decisions about a highly complex deal. More impressive has been Frampton's ability to meet deadlines and provide excellent GC oversight of this major re-development and up-fit for a large, publicly traded telecom company.

**Mauro Amarante, CEO  
IFA Rotorion North America**

This high-end facility is a reality because of the outstanding professionals involved in its design and construction. Zero accidents in over 99,000 hours worked! On time and under budget! Frampton went over and beyond my expectations and should be proud of their co-workers and partners. More to come!

**Gary Froeba, Area Managing Director  
Omni Hotels & Resorts**

Throughout the construction of Seely Pavilion, the Frampton team provided weekly updates and estimated completion dates for each level of the project. The team worked diligently to stay on time and within budget. We're excited about what this addition, with its fine craftsmanship, adds to our legacy property.

**W.T. Brogdon, Vice President of Real Estate  
Southeastern Freight Lines**

As with all our contractors, we started out with a couple of small renovation projects and progressed to much larger turnkey/design build service centers. Frampton has been a pleasure to work with. Their attention to detail and continuous improvement for quality and cost control to the owner are very much appreciated. We look forward to working with Frampton on many more successful projects.

**Jill Rodgers, Project Architect  
McMillan Pazdan Smith**

We believe good design enriches lives and enhances communities. As a project that truly defines the word 'collaboration', this facility embodies good design. Not only does it reflect the sophistication of Booz Allen Hamilton as a company, but it was delivered ahead of schedule, all through the hard work of our team and Frampton Construction's great leadership.

**Will Pace**  
**Pace Collective**

Circle Seven could not be more excited to enter the vibrant Charleston market and to have Tom Black and the Frampton team handling our important expansion into Charleston.

**Dave Raymond, Director of Construction**  
**Intermountain Management**

The Frampton Construction team worked closely with us and Marriott to round out and finalize the new 'Gen4' design in such a way that made the project financially feasible without impacting the project schedule. This project is a testament to teamwork.

**Steven Goldberg, Partner**  
**Steinberg Law Firm**

We are pleased with Frampton Construction's energy and effort in building our new home in Summerville.

**Edgar McKee, Vice President**  
**Cardinal Ventures**

Just as advertised, Frampton Construction's management teams are extremely focused. Their protocols underscore effective communication and accurate reporting as they work to accommodate special requests of the client too. Further, Frampton's culture is engineered to challenge the status quo for the best interests of the client. For example, the implementation of the construction software platform, Procore, allows Frampton to make all transmittals available real time. In summary, they are extremely client oriented and believe that the process should always be improving.

**Mark W. Neumeyer,**  
**President JEAR Logistics**

It has been an absolute pleasure working with Frampton. We could not be happier with the service and finished product - absolutely fantastic experience.

**Sascha Biehl**  
**Mairec Precious Metals**

The team at Mairec would like to thank everyone at Frampton for their support and the excellent execution of our project. It has really been a pleasure working with you guys and we are very happy with how everything turned out.

**Kyle Edney**  
**Agracel, Inc.**

As a developer it is important that I have a construction resource who is budget minded and reliable. Frampton Construction is always cost effective, organized, and willing to spend the time during preconstruction to ensure there are few, if any, surprises during construction, adding stability to the structure of my real estate arrangements.

**Dr. Edward Morrison**  
**Coastal Vascular & Vein Center**

My experience with Frampton over the years has been exceptional... Frampton's willingness to provide additional services and their time spent ensuring they understand all the needs of their clients are invaluable.

**John Warren**  
**Triad Design Group**

Triad Design Group has worked with Frampton Construction on a number of projects during the past few years. We enjoy a mutually successful, collaborative relationship, which is imperative during a design build process. Frampton Construction is a great company with respectful, hardworking team members who appreciate the specific roles of everyone involved in the project.

**Gregg Ramsey,**  
**Vice President Shawver & Son, Inc.**

We provided Frampton Construction with electrical services at the Chef Store Addition, Oklahoma City, in 2014. Team members and staff were very professional, helpful, and focused on the project. They were very hands-on and helpful with problem solving. We would readily work with them again.

**Jason Swagert, Vice President**  
**Citadel Contractors, Inc.**

For the past few years, we have provided Frampton Construction with design build tilt-up buildings and concrete and steel scopes. Frampton takes a team approach to construction and is fair to their subcontractors. The company has a good team and is willing to take on new challenges and new markets. It has been a pleasure working with Frampton Construction since 2012, and we look forward to growing with the company.

**Graham Pattison, Managing Partner**  
**UK Electric, LLC**

We worked with Frampton Construction during a seven-month period in 2013 and 2014 when we provided the electrical services for the U.S. Foods Chef store #4 in Tempe, Arizona. The field supervisor, the project manager, and the office administrator were great people to work with and

very professional! These guys are very knowledgeable of the construction trades, and the office staff members are just as experienced as the field guys. They were just a pleasure to work with – no games. RFIs were promptly answered and payments were on time. When we discovered some issues with the design plans, Keaton was diligent in his pursuit to get the correct answers from architect and engineer – very professional. They consider sub-contractors as part of their team and we'd work with Frampton again anytime. They are good people, and they are pros!

**Mary-Ellen Goforth, President**  
**Arrow Exterminators, Inc.**

We worked with Frampton Construction in 2014 when we provided soil treatment. All team members were knowledgeable, helpful, and easy to work with. As a sub, being treated fairly and being paid on time are important – and Frampton did both. We would absolutely work with this company again -- we had an excellent experience.

**Jim Shipley, President**  
**Maryland Doors & Hardware, Inc.**

We worked with Frampton Construction on a U.S. Foods Store in 2014, when we supplied and installed toilet partitions, HM door frames, and HM doors and hardware. It was a pleasure to work with Randy Christensen (job superintendent) and Keaton Green (project manager). They are hard-working, honest individuals who follow through on all promises made. Their word is their bond. Frampton's attention to detail, honest employees, and prompt payment set the company apart from other construction firms. We would absolutely work with Frampton Construction again. They maintained a great relationship with the owner of the project I worked on.

**Wayne Varner, President**  
**Varner Electric, Inc.**

We worked with Frampton Construction in 2014 when we installed the electrical system for a new building in Wilkesboro, N.C. Frampton Construction was efficient and well-organized. They were able to keep the project on schedule despite difficult weather conditions. Due to strategic early design meetings, plan preparation, and input from the owner, there were very few change orders. I would love to work on another project with Frampton Construction. Projects that run smoothly are usually profitable, and this project ran smoothly. I would happily recommend them to anyone looking to build a new building.

**Michael Goodelle, Managing Member / Owner**  
**Maverick Construction Services, LLC**

We worked with Frampton Construction on a project installing doors and hardware, toilet partitions, bath accessories and the like. Frampton Construction's office and field personnel were great to work with, and they pay on time. We would definitely work with this company again.

**Eric Carlson, President  
Streit USA**

Please convey my sincere appreciation to your entire team for building the new home of Streit USA Armoring, making it one of the premier manufacturing facilities in the armored vehicle manufacturing industry. My competition is envious.

**Robert Hamilton  
Nason Medical Centers**

My experience with them was exceptional. Communication was clear and thorough, level of respect was greatly appreciated, and the standard of work was incomparable.

**Alan Green, DVM, Owner  
Charleston VRC**

I would not hesitate for a second to recommend Chad Frampton and his team as an exemplary company. We are extremely proud of our new hospital.
